LEWIS BAKER & CO.

MONDAY, NOVEMBER 16, 1874. THE WEEKLY REGISTER

Is the largest and altogether the mos complete news and family paper printed in twenty per cent in favor of the narrower West Virginia. It will be sent to any ad- line. Sixth-The net revenues of the dress one year for \$2.00. Valuable premiums to club agents and to subscribers.

The Chicago Tribune was evidently stung by our recent article prophesying that the contest in 1876 will be between the Democratic and Independent parties. However, it makes no effort at gainsaying our remarks further than it takes us to task for speaking of "the Democratic party of old '76." It claims that the Democratic party was founded in 1830, and the Republican party in '54, and concludes with the remark that the "Wheeling man should be more careful in his historical statements."

We believe that most of our readers are as well aware of the history of the political parties in the land as is the Chicago man. What we implied, and and as we overcome our prejudices to what seems an innovation, doubtless the was generally understood, was that the Democratic party in 1876 will fight three feet road will be generally adopted under and maintain the identical principles which were declared and existed in Editors of the Register:
Will you do the favor to republish the old 76, and which will exist long after the peculiar independent principles of card that appeared in your issue of Tuesthe Chicago man are exploded and forday, and annexed rebutting evidence, as in the Virginian of this week, and oblige gotten. The Chicago man should be many of your readers hereabouts? more ingenuous and candid.

THE news from Arkansas is rather startling. Notwithstanding that his new Constitution in that State has been adopted recently by about 75,000 majority, and at the recent elections the Democratic State ticket and a solid delegation to Congress was chosen, one SMITH, Lieutenant Governor under BAXTER, has taken upon himself to issue a proclamation, refusing to recognize the Constitu- Humphreys, chief of the Engineer Detion or the elections under it, and declaring himself Governor. This prohe published in a paper called "The Republican," and having as usual in such cases, requested States Engineer Corps. the President to send forces to help him maintain himself, took to his heels. Warrants for his arrest and for that of the Hon. H. G. Davis, United States Senator, publisher, were issued. The latter was captured, but the former could not be found. He is probably after the manner of his prototype Kellogo, "latibulating" in some secure position, in breathless expectancy that His Excellency, will again and a note was added under the head of uphold usurpation, and send down the U. S. army to destroy the peace and quiet of the State.

NARROW GAUGE RAILROADS.

This is a subject of very general interest, inasmuch as the narrow or three foot gauge is evidently gaining ground to-day, is \$300,000. and may, in a short time in the future, become the standard of our railways in on Transportation Routes to the seaboard ordered by Congress at its last session, are now in progress. That for the imthe United States. Evidently it possesses many advantages over the present standard, 4 feet 81 inches, and these advanard, 4 feet 8½ inches, and these advantages have been dilated upon and distoragive six feet of navigation discussed with great care in a pamphlet at all seasons, is being conductprepared in Baltimore by Messrs, Rich-of Colonel Craighill. When his report ARD B. OSBORNE and CHARLES P. MAN-NING, civil engineers. These gentiemen of Colonel Craighill. When his report is received, a copy of it, with the esti-mates, will be submitted to the Honoraare well known in their profession, hav- ble Secretary of War, for transmission to ing acquired extended and well deserved reputations for merit and scientific acquirement, and their opinions are well Harbor Act, until the results of this surentitled to credit. Of course we could provement can be submitted. not expect, in a short article, item of \$22,000, for continuing the imto do justice to their argument, provement of the Monongahela river. nor even to present it in a more than a condensed manner. They treat the subject under eight different heads. Cost of Construction; Grades and Curvature; Outfit; Speed and Stability; Operating Expenses, and Maintenance of way; Reserve and Dividends; Branch Lines of 3 feet connecting with roads of the standard guage, how made available, and General Remarks. Under these vari-Forty years has tested the value of Dr. A. S. Todd's Anti-Billious and ous heads, figures and tables are produced Liver Pills to prove the following facts: That in the case of a double track road of each gauge, passing through a country of bold topographical features, where the en- Use gineer is put to the test to find a line Use that will afford a maximum grade of 40 feet to the mile, with a given minimum of radius for curvature, and where he may, in extreme cases compelled to adopt a grade of 80 feet per mile, the cost of the Use average standard gauge is \$69,200 per Use mile, while that of the 3 foot road is Use \$48,200, a difference in first cost of \$21,000 per mile. This too is an exceedingly LAUGHLIN BROTHERS & CO., liberal estimate of the cost of the 3 foot road. As these gentlemen say: by constructing a 3 foot road, 100 miles long destined to do a large coal tonnage, instead of the standard guage. the saving would be sufficient in 101 years, if compounded at 7 per cent, to repay all but \$6.200 per mile of the entire

Under the second head, that of curves and grades, it is shown that in hauling SCHULZ'S trains of the same gross weight on different grades, the engines of the 3 foot road will, in every instance, haul either more paying weight in its train, or if only hauling the same paying weight, will have a lighter train in the gross weight, enabling it to successfully overcome heavier grades, than can its standard opponent. The gross weights assumed on the different roads and grades are probably the will, on Monday. Second Parallel Will, on at leo'clock a. m., at Nos. 1649 and 1651, on Market street, in the city of Wheeling, sell at public auction the following described property, that is to say: One bedstead; bed and bedding, Ibureau, one ward robe, two wash stands, one parlor carpet, six chairs, one cooking stove and cooking utensils, one kitchen table, besides various other articles of household furniture. Sale positive. Terms cash. F. SCHAFER, novi3h. Trustee average weights of trains employed in doing heavy coal trade, and the following points are made. On a level road, the gross weight of trains being 1,460 tons. the three foot engines will haul with 399 tons of cars 1,064 tons of coal, against 566 tons of cars and 900 tons of coal on NEW CROP the 4 foot 84 inch road. Similar results in favor of the smaller roads are found on grades of 26.4 feet, 40 feet and 80 feet per mile, all showing a large excess of monied value of coal tonnage in the smaller, ove Sugar and Molasses the larger gauge, "It is also shown that the sharp curvature, as now in use, which is so destructive to the rolling stock of the standard gauge, can be traversed without injury on the three foot gauge. Under the third head, Outfit, it is nell

cost of an expensively constructed road.

Atherling Register. shown that the cost is almost 12 per cont NEW ADVERTISEMENTS less, and about half the weight for the same business, in the smaller road. Fourth- the speed which is now maintained in our regular traffic, can be fully adhered to on the three foot lines, and

itg, and in certain cases more sufety.

Fifth-the cost of operating is almost

wide road may reach 7 per cent, while

those of the three foot promise 20 per

cent, which will enable transportation

charges to be materially reduced on the

three foot road. Seventh-that three

foot branches can be built advantageously

to connect with standard roads, even where

transhipment is unavoidable, because the

saving in the cost of constructing the

road, will more than repay the cost of

transhipment. And it is contended that

this transhipment can be made at 6 to 10

cents per ton, and that further, it would

be to the advantage of standard trunk

lines to lay a third rail to accommodate

the numerous three foot branches which

would immediately seek a union with

Fairment Normal School.

AND REPAIRING OF ALL KINDS OF TIRE ARMS. och.

AYER'S CATHARTIC PILLS. For the relie

derangements in the stomach liver, and bowels. They are a mild aperient, and excellent purgative. Being purely vegetable, they contain no mercular them on hand for their protection and relief, when required. Long experience has proved them the safest, surest, and best of all the Pilis with which the market abounds. By their occasional use, the blood is purified, the corruptions of the system expelled, obstructions removed, and the whole machinery of life restored to its healthy activity. Internal organs which become clogged and sluggish are cleansed by Ayer's Pilis, and stimulated into action. Thus inciplent diseases is changed into health, the value of which change, when reckoned on the vast multitudes who enjoy it, can hardly be computed. Their sugar coating makes them pleasant to take and preserves their victures unimpared for any length of time, so that they are ever fresh, and perfectly reliable. Although searching they are mild, and operate without disturbance to the constitution, or diet, or occupation.

Full directions are given on the wrapper to cach box, how to use them as a Family Physic, and forthe following complaints, which these pills rapidly cure:

For Dyspepsia or Indigestion, Listlessness, Langour, and Loss of Appetite, they should be taken moderately to stimulate the stomach, and restore its healthy tone and action.

For Liver Complaint and its various symptoms, Billious Headsche, Sick Head-

ach and bowels, retores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these Pills makes him feel decidedly better, from their clean-Medicines for all diseases by mail ing and renovating effect on the digestive PREPARED BY
